

## SAINT LUKE'S LECTURE

10th February 1993

Delivered by Professor Adrian Harris on  
"Abberant Angiogenesis – A New Target for Cancer Therapy"

This year the Academy and Saint Luke's Hospital decided to invite a distinguished oncologist to deliver the eighteenth Lecture. Professor Adrian Harris, B.Sc., M.A., D.Phil., F.R.C.P., Director ICRF Clinical Oncology Unit, Churchill Hospital, Oxford decided to come and on Wednesday 10th February he delivered his lecture on "Aberrant Angiogenesis – A New Target for Cancer Therapy" to a large and very select audience in the College of Physicians.

Professor Harris is a most distinguished research worker

and teacher. His visit to the Academy was warmly welcomed by Dublin Oncologists, Haematologists and Professor James Fennelly expressed their interest in his lecture when he spoke in support.

Dr. Cooney on behalf of Saint Luke's Hospital, joined the President of the Academy on the dais and expressed his appreciation of the lecture and of the co-operation of the Academy. He presented the silver medal and cheque to Professor Harris.
